VIGNESHAYYANAR

FLUTTER DEVLOPER

I am a passionate Flutter App Developer with expertise in building cross-platform mobile applications. I specialize in Flutter & Dart for app development and Firebase for backend services like authentication, real-time databases, and storage. Additionally, I have hands-on experience with AWS where I worked on cloud resource management, automation, and scalability.

WORK EXPERIENCE

Ignito Corporation - Startup   **JULY 2025 – AUGUST 2025**

Flutter App Developer Intern

- Developed mobile applications with Flutter and Firebase integration.
- Worked on real-time database, authentication, and UI/UX improvements

Brainovision Solutions India Pvt. Ltd.   **Feb 2025 – Jun 2025**

AWS Intern

- Created an AWS Cloud Resource Management System for automation and monitoring.
- Configured EC2, S3, Lambda, and CloudWatch ensuring security and scalability.
- Implemented real-time monitoring, auto-scaling groups, and cost optimization strategies.

PROJECTS

Attendance Management System   **Github Repo**

Built with Flutter and Firebase, featuring separate logins for students, staff and admins. Supports attendance tracking with color-coded status, automated alerts for low attendance, timetable notifications, staff leave/OD management, and detailed performance reports.

Harvest Hub   **Github Repo**

A Flutter app connected to Firebase where users can post and share extra food or items. Provides real-time updates, location-based availability, and flexible roles (users can act as donors and receivers). Includes secure sign-up/sign-in for seamless access.

Contact Management App   **Github Repo**

Flutter + Firebase application with user authentication, password reset, and OTP verification. Supports full contact management (add, edit, delete), integration, and profile/account management.
